

Grant Pre-Review Program

(Available throughout the year)

- 8 awards of \$400 each to support pre-review of a federal grant proposal by an external expert.
- Applications will be accepted and reviewed continuously throughout the year.
- Application should include a draft of the proposal, a copy of the RFP for the federal program to which the grant will be submitted, and a list of up to three potential external reviewers, including contact information (e-mail and phone).
- Preference will be given to faculty who have not received major federal funding as a principal investigator, to faculty who are submitting to a federal program for which they have not previously received funding, and to faculty who have not previously participated in the Grant Pre-Review Program.
- Participating faculty are expected to submit their application sufficiently far in advance of the RFP deadline to allow at least four weeks for the pre-review and sufficient time to incorporate suggested changes to strengthen the proposal before submittal to the federal agency. Participating faculty will be expected to submit the reviewed proposal to a federal agency within six months of participating in the Grant Pre-Review Program.
